Summary

Genuine, motivated, and versatile IT professional with 25 years of experience in the IT industry with roles as application and system developer, IT-, and Data analyst, Project manager, Pre-sale, System administrator, and support at all levels. Analytical, business oriented, entrepreneurial, and creative mindset with great international experience.

Highlights of my background and accomplishments include the following:

- Designed and built configurable mapping system with support tools, from idea to coding, training and support. Graphical configuration and instant testing enabled customer representatives to model, test, and implement e-invoices without any coding, or any developer involvement. This solution helped the customer to win important business agreements and increase their financial product's turnover with more than 1Bn SEK annually.
- Delivering expert recommendations and managing integration and implementation projects for companies in need of technological solutions and software platforms; successfully setting up, configuring, and migrating systems and services while advising on security vulnerabilities, outdated systems, and hardware upgrades.
- Researching and documenting new processes for IT teams while working directly with users to gather business requirements and inform proposed system enhancements.
- Managing all aspects of technical projects from start to finish, including scheduling, resource allocation, guidelines/deadlines, and risk management; communicating regularly with IT management and users regarding project status, areas of concern, and deliverables.
- Demonstrating expertise in current IT business trends, data modeling, value chain analysis, systems analysis / project management, programming, and system management.
- Proficient in a variety of software applications including Microsoft Office Suite + VBA, Project, Business Objects, and SQL.
